DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kinkel et al (US Patent 6,223,545). Kinkel discloses a cooling unit comprising: an evaporative cooling apparatus (118), a first inner side panel (70), a second inner side panel (72), an intermediate inner side panel (74) whereby all abut a structure, a first flange (96) residing in a horizontal plane, a second longitudinal flange (98) and situated in a substantially perpendicular fashion with said first and second inner side panels.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3744

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 16 & 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Litz (US Patent No. 6,575,436). Litz discloses an evaporative cooler with a housing situated on a roof of a vehicle structure which can inherently be situated on a building structure and comprising: an evaporative cooler (10), a housing with upper & base panels (40,50) whereby the base portion extends through a roof structure (see figure 1), an evaporative pad (80), a fan (30) and rods with bolts are used to secure said cooler to the structure.

Allowable Subject Matter

Claims 9-15 are allowed over the prior art of record.

Claims 2-8 & 18-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
